

# QUALITY POLICY

At **FABRIQUIMICA**, we are committed to fostering a safe, harmonious, and continuously developing work environment for our personnel. We also strive to contribute to environmental protection by preventing pollution and offering raw materials of the highest quality to meet our customers' needs, supporting their sustainable growth.

We conduct our activities in an environment that encourages the commitment of all members to the continuous improvement of processes, while complying with legal and regulatory requirements and respecting the company's Code of Ethics.

## OBJECTIVES

- Develop the skills, abilities, and knowledge of the company's employees, fostering their personal development, awareness of Quality, environmental aspects, and social responsibility. Enhance motivation and personal satisfaction resulting from their work.
- Identify our customers' needs as accurately as possible, adapting to each customer's specifications while maintaining alignment with the organization's interests.
- Establish strategic partnerships with our suppliers and customers to ensure and optimize inter-company relationships, promoting business integrity.
- Ensure, from **FABRIQUIMICA's** Management, the communication, understanding, implementation, and maintenance of the policy for all interested parties.
- Standardize and continuously improve products and processes to achieve production excellence.
- Continuously improve the effectiveness of the Quality Management System.
